WE CAN PROVIDE:

- Strategic parking plans
- Policy and guideline development for parking management
- Parking facility design, including multi-level and surface lots
- Parking wayfinding, signage and accessibility schemes
- Demand and supply assessments for new and existing developments
- Traffic flow analysis within and surrounding high volume parking facilities and events
- Accessible and electric vehicle (EV) parking planning
- Revenue modeling and pricing strategies
- Parking technology integration (e.g., automated systems, access management, sensors)

Parking plays a crucial role in the functionality and accessibility of transport systems, supporting the movement of people and goods across urban and regional areas. Effective parking planning and kerbside management balance the needs of drivers, businesses, and communities while promoting sustainability, accessibility, and economic activity.

EXPERIENCE

Point8 has extensive experience in delivering parking solutions that address the challenges of limited space, increasing demand, and changing mobility trends. We understand that effective parking systems require a combination of strategic planning, community engagement, demand and supply analysis, innovative design, and operational efficiency.

Our team collaborates with clients to create tailored parking strategies and designs that optimise space utilisation, ensures equitable allocation of road space, and align with broader transport and land-use objectives including supporting objectives for increasing public transport and active transport. From planning new facilities to optimising existing parking networks, **Point8** ensures sustainable and efficient outcomes.

Point8 provides a comprehensive range of parking services, including:

- Parking policy and strategy development
- Parking demand analysis and forecasting
- Parking layout and facility design
- Parking pricing and revenue strategies
- Accessibility and compliance reviews
- Smart parking and technology integration
- Urban centre, corridor, and facility specific parking studies
- Planning scheme reviews and code assessments
- Demand management strategies for major centres, special events and seasonal parking demands
- Car park access, servicing, and layouts: design, auditing and compliance
- Service vehicle swept paths
- Car park safety and efficiency audits
- Operational improvements to maximise efficiency
- Wayfinding and signage strategies
- Event parking management plans

We deliver parking solutions across a range of sectors and project types, including:

- Regional and local government areas
- Urban and commercial centers
- Hospitals and health precincts
- Education campuses
- Transport hubs and interchanges
- Event venues and recreational facilities
- Temporary event parking
- Airports and ports
