WE CAN PROVIDE:

- Construction and event traffic management plans
- Construction stage planning, tender documentation and cost estimation
- Traffic Guidance Schemes (TGS) (for static, mobile and short-term low impact works)
- Temporary signals, linemarking, barriers and temporary works designs
- Construction and event transport impact assessments and mitigation planning
- Application assessment, peer review or compliance reviews
- Construction and post-construction road safety audits
- TTM compliance audits and independent inspections
- Worksite TTM incident investigations and expert witness

Temporary Traffic Management (TTM)

ensures the safe and efficient flow of traffic and pedestrians during roadworks, events, or other temporary disruptions. A risk-management approach is required to balancing safety, access, community impact and cost. Effective TTM minimises disruptions while never compromising the safety of road workers, road users, and the community.

EXPERIENCE

Point8 has extensive experience in delivering temporary traffic management solutions across a wide range of projects. As recognised national experts in the field, **Point8** has advised public and private clients throughout Australia on every aspect of TTM, ranging from developing National guidance, improving organisational capability, and developing complex solutions to challenging TTM projects.

Our team excels in designing and implementing practical, compliant traffic management plans that meet project requirements, minimise disruption, and adhere to all relevant standards and guidelines. We understand the importance and the challenges of maintaining safety and accessibility during temporary conditions, whether for small-scale works, major infrastructure projects or high-profile events.

Point8 offers comprehensive TTM services, including:

- National and State level research, guidance and advice
- TTM training courses, training content and assessment
- Construction and major event traffic management planning
- Planning, staging, design, implementation and auditing of traffic guidance schemes
- Liaison and negotiation with local community, road authority and government stakeholders
- Detailed design of long-term temporary traffic arrangements and temporary works
- Planned and unplanned event and incident management plans
- Pre-tender project traffic management impact assessment
- Event parking supply and demand management strategies
- Resourcing for Traffic Manager/NTO/TMD roles
- Risk assessment and mitigation strategies
- Worksite access management strategies

Point8 deliver TTM solutions for various project types and scenarios, including:

- Project planning and constructibility reviews
- Tenders for major infrastructure projects
- Transport infrastructure upgrades
- Road construction and maintenance
- Utility works and services installation
- Incident response, emergencies and emergent works
- Major events and festivals
- Pedestrian and cyclist detours
