

Point8 has experience in a wide range of public transport projects, from planning and construction, to operations and maintenance. We have worked with a range of public transport clients including transport and service planners, network operators, and construction companies.

Our staff are experienced in working on projects with a customer first focus, ensuring that the needs of the end users are recognised and understood.

Point8's services include Network and Service Planning, Operations, and Interchange and Facility Design.

Network and Service Planning

Point8 understands the need for efficient and effective public transport networks. Our team is experienced in:

- Network and operational service plans
- Bus rapid transit and light rail corridor studies
- Micro simulation modelling of busways, routes and priority treatments
- Corridor studies

Operations

We are experienced in working with public transport providers and network operators to provide a range of services to improve the safety, efficiency and effectiveness of transit and bus services including:

- Safety and operational reviews
- Traffic management plans and traffic guidance schemes
- Event transport planning
- Local access transport management plans, including venue access plans

Interchange and Facilities Design

Point8 has experience in preparing design advice and providing drafting services for public transport facilities including:

- Public transport infrastructure review and advice
- Park and Ride facility design and operations review
- Interchange and station design
- Accessibility planning and auditing

Infrastructure Planning

Point8 also has a strong reputation in the fields of integrated transport planning, transport modelling and pedestrian access and mobility planning to support public transport projects.

We can provide additional public transport services including:

- Light rail and tramway safety reviews
- Strategy and policy development
- Passenger data collection and analysis

ABOUT US

Point8 is an independently owned professional services firm specialising in traffic engineering and transport planning. We provide expert advice and services to a wide range of public and private sector clients. Our objective is to add value to our clients' organisations and ensure the safe, efficient and sustainable movement of people and goods throughout the communities we serve. Our focus is on developing long term relationships with our clients and stakeholders by delivering exceptional service and best practice advice that considers both organisational objectives and community needs.
